

PELI Artisan Glass System

Enjoy the *look and feel of your stained glass on the interior*,
the *energy savings of double glazing*,
and on the exterior: *PELI Anti-Glare Glass*

PELI Glass offers the complete solution! **PELI Artisan Glass System**

PELI Artisan Glass System

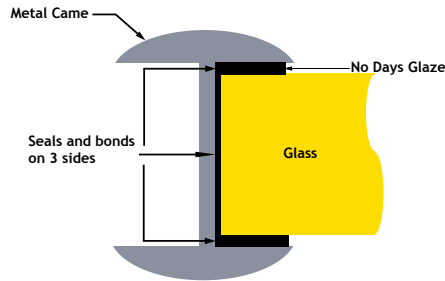

A double glazed insulating unit that combines the beauty of stained glass with the comfort of insulation!

Stained glass on the interior and your choice of insulating glass (blown glass, drawn glass, float glass or laminated glass) on the exterior. We can treat the exterior glass with a weather-resistant anti-glare coating in combination with an extra coating to create a self-cleaning surface so that water beads off.

What's our secret?

The stained glass panel is constructed with the unique proprietary NDG pre-glazed lead came - easy to use, clean, no out-gassing and your panel is immediately strong and ready for the next step.

Due to the special formulation of the NDG glazing material the stained glass panel can be used on the inside of an insulating unit. Keep the true stained glass feeling in the interior! The **PELI Artisan System** can be constructed with your choice of exterior glass. And we can treat the exterior glass to reduce glare and can offer you an additional long-lasting self-cleaning treatment.

Advantages PELI Artisan Glass System

- Stained glass panel is strong and immediately ready to install, no drying time necessary for the kit
- True stained glass look and feel on the inside of the building
- Energy savings
- Anti-Glare exterior glass - avoid that unnatural shine
- Slender profile (from 15 mm) allows installation in most demanding situations

Great for:

- Restoration and modernization of stained glass panels
- New work
- New building and monuments
- Private homes

Perhaps your situation only requires the PELI Anti-Glare Glass or only a NDG pre-glazed lead came panel?
No problem!

Contact us for a no-obligations offer or appointment. We'll assist you to find an affordable solution that blends with your needs and your architecture.
