## Reusche Colors

### Blendable Bending Colors / Mengbare Glasverven voor Slumping

5 min 649 - 704°C (1200 - 1300°F)

D201581 White		D242013 Black		D281097 Orange	
D211824 Yellow Red		D252174 Green		D293355 Red Brown	
D211827 Blue Red		D252174 Chrome Green		D283360 Brown	
D211831 Maroon		D261939 Blue Green		D293363 Buff	
D232782 Green Yellow		D273889 Green Blue		D293371 Dark Brown	
D232786 Orange Yellow		D273893 Red Blue		D193376 Dark Brown	
D232792 Gold Yellow		D273908 Dark Blue			

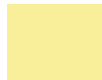

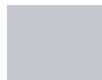

Bendable Blending colors are unique because they liquefy before the glass reaches bending stage. Opaque colors remain fluid without running through the glass bending or slumping period. They do not burn out or change color (as is common with some transparent colors, particularly cadmium or selenium colors: red, orange, maroon). May be fired while the glass is flat. Colors can be lightened by adding White (D201581). Adding other colors will achieve entirely different colors.

Mengbare Glasverven voor Slumping zijn uniek omdat zij versmelten voordat het glas de buig en/of slumping staat bereikt. De dekkende verven blijven vloeibaar tijdens het buig- of slumpingproces. Zij verbranden of veranderen niet van kleur (wat gebruikelijk is bij sommige transparante kleuren, vooral cadmium of selenium glasverven zoals rood, oranje, kastanjebruin). De glasverven kunnen worden gebrand als het glas nog vlak is. De verven kunnen lichter worden gemaakt met witte glasverf (D201581). Vermenging van kleuren kunnen onverwachte resultaten opleveren.

## Oster

### Silver Stains / Zilvergeel Glasverven

621 - 635°C (1150 - 1175°F)

Ancient  
Lemon

Pale yellow stain, can be blended with the other two to achieve the desired effect.

Ancient  
Winchester

Deep stain but not as intense as the Walpole. It is extremely clear and is less likely to 'metal' than the Walpole.

Ancient  
Walpole

Rich golden stain, can even border on orange. The depth of color resembles stains from previous centuries.

## Transparent reds / Transparante rood

600 - 620°C (1112 - 1148°F)

Red

Ruby

Purple

## Mediums & oils, Gum Arabic / Mediums & Olieën, Gum Arabische

### Sir Pete Paint Medium

Slow drying paint medium, can be used with all our colors and all sorts of painting techniques such as paintbrushes, pallet knives, screen printing, watercolor-type effects and for freehand painting. Burns out at 450°C (842°F). Cleans up easily with water.

Langzaam drogende glasverf medium, kan worden gebruikt bij al onze glasverven en is geschikt voor diverse schildertechnieken, zoals met kwast, penseel, paletmes, zeefdrukken, airbrush, aquarel en nat-in-nat schildertechnieken. De medium brand uit op 450°C. Makkelijk te reinigen met water. (100 ml, 250 ml, 1 liter)

### Sandalwood Amyris Oil

For use with oil-based painting techniques. (10 ml, 100 ml) basis oil

### Lavender Oil

For use with oil-based painting techniques. (25 ml) thinning oil

### Gum Arabic, liquid Arabische Gom, vloeibaar

Winsor & Newton (75 ml)

### Gum Arabic, powder Arabische Gom, poeder

Reusche (28 g, 100 g, 225 g, 450 g)
